

1. What is the purpose of the evaluation session?

The learning module under review is located at <http://mariedlara.wix.com/digitalportfolio>. The purpose of the evaluation session was to assess the effectiveness of the multimedia learning and the usability quality of this video series to teach students to create a digital portfolio using Google Sites and other freely available tools.

2. Who is involved in the session? What is his/her profile?

The Subject Matter Expert (SME) who agreed to evaluate my instructional unit is Sister Mary Paul Hon, a retired former school teacher and administrator who received her BA in Education at St. Edwards University in Austin, and her MA in Administration Loyola University in New Orleans. She also studied at Texas A & I University in Kingsville as well as Saint Mary's University in San Antonio. Sister Paul has taught for a number of years in various grade levels as well as served as an elementary, middle school and high school principal. Besides the fact that my Subject Matter Expert has extensive experience in academia, she promotes the idea of lifelong learning and the pursuit of knowledge and education. She continues to serve as an advisor and facilitator to a number of professionals in the field. Sister Mary Paul Hon also previously provided me with a formative evaluation of a similar module.

3. Where is the session taking place?

Sister Mary Paul Hon was able to access the learning object online through a web browser after I provided her with a link to the site.

4. What are the results?

The objectives of the Introduction to the Digital Portfolio training course, Module Lesson 1 are that:

Objective 1: The student will be able to develop and customize their own Digital Portfolio navigating the Google Sites interface and

Success Rate: 100%

Objective 2: Identify the various components of an e-Portfolio template, and

Success Rate: 100%

Objective 3: Students will be able to add and organize pages and link to content by creating page links,

Success Rate: 100%

General Comments:

Nice clean website, but the "Home" page may be a little busy.

Your instructions may not be as clear as they should be.

User control / Freedom:

Easy navigation except through the end of the quiz.

Consistency & Standards:

At this point there is just one lesson.

Flexibility Efficiency:

Good, but maybe could be broken down further.

Additional Comments:

Good subject matter. Look forward to the addition of the other modules.

5. What is your reaction to the results?

I continue to be disappointed in the quiz or testing programs I have been experimenting with. I wanted to add a hot spot activity from Thing Link (<http://www.thinglink.com/scene/536772456648540160>) but was unable to. I somewhat liked the quiz/test features I found on Google Sites, but I was not able to add them to this website. I will continue to research programs and try to get that mix that can work seamlessly with these projects.

I believe Sister Paul expected me to have a more complete lesson, instead of just the initial module.

6. What is your action to the results?

I will continue to work on the layout(s) within Wix, add the additional modules, and make recommended changes and fixes.

General concerns and inconsistencies:

- The second set of floating images of sample portfolios may be unnecessary. I may alter and change styles until I find a cleaner Home page.
